PROFILE

Student software developer at grit:lab with 4+ years of experience as a QA Engineer / QA Lead in web projects. Strong foundation in JavaScript/TypeScript, Java, Go, web frameworks and REST APIs. Used to working in cross-functional teams, analysing requirements and shipping reliable features. Currently looking for an entry-level (junior/trainee) role in frontend, backend or full-stack development.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Java, Go, SQL
- Web: HTML5, CSS3, REST APIs, JSON
- Frameworks: Vue.js, Spring Boot
- Databases: PostgreSQL, SQLite, MongoDB
- Tools: Git, GitHub, Docker, Linux, VS Code, Postman, Jira, Confluence
- Methods: Agile / Kanban / Scrum, cross-functional teamwork

Testing & QA

- Strong experience in web application testing (functional, regression, smoke, UI).
- Cross-browser and cross-platform testing (desktop and mobile).
- Good understanding of QA methodologies, tools and processes (SDLC / STLC).
- Solid knowledge of test design techniques and reviewing software requirements.
- Writing and maintaining test documentation (test cases, checklists, reports).
- Defect lifecycle management: logging, prioritising and tracking bugs in Jira.
- Understanding of web technologies: HTML, CSS, client-server architecture, APIs, JavaScript.

EXPERIENCE

Student Software Developer · grit:lab

Mariehamn, Åland Islands · 2024 – Present

- Developing full-stack web applications as part of an intensive, project-based program.
- Building backends in Go (APIs, data processing, concurrency, networking).
- Creating REST APIs in Java/Spring Boot with databases (e.g. PostgreSQL, MongoDB).
- Implementing frontends with JavaScript/TypeScript and Vue (SPA, state management, routing).
- Working daily with Git/GitHub, code reviews, pair programming and self-directed learning.

QA Engineer → QA Lead · Viseven

Zhytomyr, Ukraine · 2020 – 2024

- Tested web applications in a cross-functional team (functional, regression, UI, cross-browser / cross-platform).
- Designed and executed manual test cases, created and maintained test documentation (test cases, checklists, reports).
- Logged, tracked and retested defects in Jira, collaborating closely with developers, BAs and PMs.
- Analysed requirements and clarified edge cases to prevent defects early in the process.
- Provided clear updates on testing status, risks and quality before releases.
- Gradually took on QA Lead responsibilities: prioritising testing tasks, reviewing test cases and supporting new team members.
